**Standard**
ISO 17672                                    CuP 179
*(DIN EN 1044 )*                             *(CP  203)*

**Nominal composition [wt.-%]**              Cu remainder;  P 6.2
Permitted impurities max. [wt.-%]            Al 0.01; Bi 0.030; Cd 0.01; Pb 0.025; Zn 0.05; Zn + Cd 0.05
Max. impurities [wt.-%]                       0.25

**Technical data**
Melting range                                approx. 710 - 890 °C
Working temperature                          approx. 760 °C
Density                                      approx. 8.1 g/cm³
Tensile strength acc. DIN EN 12797           approx. 250 MPa with Cu
Elongation                                   approx. 5 %
Operating temp. of brazed joint              max. 150 °C (without loss in strength)

**Standard delivery forms***
Wire:                                        1.0 - 1.5 - 2.0 mm Ø
Rods:                                        1.0 - 1.5 - 2.0 mm Ø, 500 mm length
Preforms:                                    rings, shaped parts, sections
*Other delivery forms upon request

**Applications**
BrazeTec S 94 is a phosphorous-containing brazing alloy with excellent flow characteristics. The brazing alloy is suitable for joining copper to copper or copper-based materials. Due to its phosphorous content, you have not to use an additioal flux for brazing only copper to copper. This brazing alloy is not allowed to be used if sulfur containing medias may have contact with the joint during operating. Further it is not allowed to use this alloy for joining steels (Fe) or materials containing iron, nickel cobaltas it will be formed brittle phases in the joint. In refrigeration and air conditioning industries BrazeTec S 94 can be used for service temperatures down to -50°C. It can be used for brazing with flame, with induction heating and in a furnace under protective atmospheres. Typical applications are found e.g. in the plumbing trade, in the electric industry and for the refrigeration and air conditioning industry.
BrazeTec S 94 meets the requirements of the working sheet "GW2" and "GW 7"of DVGW (German association of Gas and Water). It is approved and registered by DVGW (DW-0105CL0476) and has been awarded by the Gütegemeinschaft Kupferrohr e.V. (The coppertube Manufactures Quality Association).
