VIKING® 3250D FGS™ SERIES WELDING HELMET
WITH INTEGRATED FLIP-UP GRIND SHIELD

THE SINGLE HELMET SOLUTION

In any fabrication environment, productivity, safety and optic clarity are important. The **VIKING® 3250D FGS™** from Lincoln Electric provides enhancements to each of these elements when compared to a standard welding helmet. Designed for the professional welder, the 3250D FGS significantly increases the operators' field of view with the integration of a clear face shield and side windows. These features can reduce the amount of time needed to conduct material setup, inspection and weld operations. The increased FOV also can make general movements less hazardous and eliminates the need for removing the helmet to conduct various required tasks. This is coupled with an industry leading optic design, 4C® Lens Technology, which maximizes color distinguishment while eliminating blur, distortion and providing a consistent shade at any angle. The 12.5-square-inch auto-darkening viewing area is the largest for this product type industry wide. This provides a perfectly clear widescreen view of the arc, puddle and base material to maximize quality, productivity and control.

Every professional fabrication task comes with its own set of circumstances and demands, but when it comes to productivity, safety and optic clarity, the 3250D FGS is the only welding helmet you need.

Industry Leading Optics

The VIKING® FGS™ 3250D welding helmet features world class optic technology to improve quality, expand safety and reduce eye strain.

4C® LENS TECHNOLOGY

Lincoln Electric's proprietary liquid crystal display (LCD) enhances the visible color spectrum of the display. Unlike traditional auto-darkening filters, 4C® lens technology broadens the color range & hues which can be seen in both light and dark states. This eliminates imperfections and color saturation to create the clearest view of the base material, arc & puddle, while reducing eye strain.

PERFECT OPTICAL CLARITY

No Blurriness

No Distortion

Completely Even Shade

Uniform Angle Clarity

INDUSTRY'S LARGEST VIEWING AREA*

Widescreen aspect ratio increases FOV

Digital controls increase precision

*For Auto-darkening welding helmets with an integrated grind shield

Maximizing Field of View

The VIKING® FGS™ 3250D welding helmet increases field of view in both the open and closed positions. This provides operators with various safety and productivity enhancements.

- ANSI Z87.1 compliant grind shield protects operators from various impact hazards
- The 161 Degree field of view makes material inspection, grinding and general movements less hazardous
- Shade 5 side windows increase peripheral vision in the closed position
- The anti-fog lens coating allows for a more consistently clear view

PRODUCTIVITY

- The integration of a clear grind shield shortens the amount of time needed to begin grinding operations and eliminates the need for a separate face shield
- The expanded field of vision in both positions can reduce setup, inspection and weld time
- The large auto-darkening viewing area enhances operator control

Cheater Lens Capable

- Simple slide-in bracket is mounted on the auto-darkening filter to offer vision assistance
- Compatible with 2 x 4 dimensioned lens

Hard Hat Capable

- Helmet shell design offers clearance for an expanded range of hard hats
- Compatible with slotted & non-slotted hard hats
- Robust connection design

Advanced Headgear

- Easy forward and backward slide adjustments
- Up and down orientation pin
- Vertical position lock
- Variable tightness expands versatility

3250D FGS™ Welding Helmet

KEY FEATURES

1. **4C® Lens Technology** provides an unparalleled view of the arc, puddle and base material while reducing eye strain
2. **Perfect 1/1/1 Optical Clarity** eliminates distortion and blurriness while maintaining shade consistency and improving angle performance
3. **12.5 Square Inch Auto-Darkening Display** offers a widescreen process view to broaden field of view and enhance operator control
4. **Shade 5 Side Windows** increases peripheral vision in the closed helmet position
5. **Flame Retardant Head Covering** provides protection from spatter and improves comfort
6. **Large Integrated Grinding Shield** protects operators from impacts while providing a clear viewing area for grinding and material inspection
7. **Anti-Fog Coating** helps maintain a consistently clear view
8. **4 Axis Headgear** provides multi-directional adjustments to evenly distribute weight and improve comfort

Comes with Helmet Bag,
Bandana, Side Window Covers
and Extra Cover Lenses
